

MSI-4260 Port-A-Weigh

TODAY'S

*Precise
Approach*

TO OVERHEAD INDUSTRIAL WEIGHING

Since its introduction in 1979, the MSI-4260 "Port-A-Weigh" has become an industry standard for an accurate, reliable and safe overhead crane scale. No other crane scale has matched the many features and benefits of the Port-A-Weigh or performed with the same integrity under the most extreme operating conditions.

Port-A-Weigh incorporates the latest in electronic and mechanical design. Advanced micro-electronics coupled with rugged packaging allow for precision accuracy while exposed to industry's roughest environments. Since its conception, Port-A-Weigh has served duty in a broad range of applications throughout the aerospace,

chemical, marine, mining, petroleum and steel industries. The versatility and dependability of Port-A-Weigh has made it the most specified crane scale on the market today.

With over ten years experience in the weighing and measurement industry, MSI's reputation stands as the foremost manufacturer of electronic crane scales. Backed by a one year warranty, we guarantee Port-A-Weigh will perform to your highest expectations. Sales, installation and service is provided by our worldwide network of factory trained representatives. Call or write today for an in-plant demonstration.
